For a
Healthier
lifestyle

NEW OR EXISTING HOMES DIY KIT OR INSTALLED

DUCTED VACUUM SYSTEMS

Our systems are the most convenient, efficient modern method for cleaning every corner of your home. The power unit is located outside the living area in the garage or on an external wall of the home. Your system is so quiet you can use it without disturbing your baby or families TV enjoyment.

Simply insert the lightweight hose into the wall or floor inlets, located conveniently throughout your home. No more loose plugs or tripping over tangled electrical cords. No recirculated dust or dirt, dust and odours are whisked away and exhausted harmlessly outside the living areas and back to the power unit.

A **Premier Clean Ducted Vacuum System** costs little more than ordinary vacuum cleaners, they are so much easier for you to use and healthier for your families environment.

DUST MITES - ASTHMA - HAYFEVER

Dust mites are a significant cause of allergic reactions associated with Asthma, Sinusitis, Hayfever, Eczema, Skin Disorders and Eye Infections. All of these can be associated with using conventional vacuum cleaners, infrequent emptying of vacuum cleaner bags & poor cleaning, amongst other things.

A **Premier Clean Ducted Vacuum System** allows for easy dust removal. The dust does not actually recirculate back into the home whilst vacuuming, which can happen when using conventional portable vacuum cleaners.

The **Premier Clean Ducted Vacuum System** utilises an external dust collection point that requires only infrequent emptying and eliminates re-circulation of allergens into the home.

- Bagless
- Self cleaning filter
- 5 year warranty for the Premier 520, 550 & 850
- 3 year warranty for the Premier 250
- Soft start control for longer motor life
- Variable speed option
High or low speed with two speed hose
- Option to change to a bag machine
- High efficiency commercial grade motors
